## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1 - 16, drawn to porous organosilicate polymer composite.

Group II, Claim(s) 17 - 18, drawn to a semiconductor device.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature, an organosilicate polymer composite formed from an organosilicate and polymer with a hydrolysable alkoxy silyl group, is not a special technical feature as it has been revealed by US 2001/0053840 to Ko et al. (Paragraphs 17 – 21).

Art Unit: 4134

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

With respect to the cyclic compounds used to prepare the branch portion of the radial pore-forming polymer, the applicants are advised to elect one of the following species: Formula 1A, 1B, 1C, or 1 D.

With respect to the radial pore-forming polymer, the applicants are advised to elect one of the following species: Formula 4, Formula 5, Formula 2, or Formula 3. Should the radial pore-forming polymer of Formula 4 be selected, the applicants are advised to select one species of X. Should the radial pore-forming polymer of Formula 5 be selected, the applicants are advised to elect one species of X and one species of R<sub>4</sub>. Should the radial pore-forming polymer of Formula 2 be selected, the applicants are advised to elect one species if X. Should the radial pore-forming polymer of Formula 3 be selected, the applicants are advised to elect one species if X.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 4134

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

No claims appear to be generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 4134

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
